DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 21, 26, 33, 38, and 43-45:

The primary reason for the allowance of claim 1, 21, 26, 33, 38, and 43-45 is the inclusion of the method steps of: fitting components of a motor control signal to a corresponding number of first orthogonal pairs in a set of weighted orthogonal pairs, the orthogonal pairs being orthogonal to the frequency pairs. These are the features found in the claim, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-11 are allowed due to their dependency on claim 1.

Claims 13-20 are allowed due to their dependency on claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cooke (USPN 5,969,498) teaches an induction motor controller, Divan (USPN 5402053) teaches a single phase to three-phase converter capable of variable speed motor operation, and Gritter (USPN 4,821,532) teaches a current mode motor control.
